Zip-Out mailer A safe and secure mailer

PRINT

INSERT

FOLD & POST

UN-ZIP

“The mailer is printed,
an optional insert
added, folded then
posted”

This is a brand new approach to one-piece mailers. The form offers both extra security and the ability to add further information as a separate insert which will be secured inside the document before folding. No more tearing the edges - the recipient simply unzips the tamper proof form to reveal the secure pay advice and to receive the additional staff information.

We have become aware that our customers are looking to add security and added flexibility to their current conventional one-piece mailer.

The Zip-Out mailer is designed to carry a whole host of further information to the recipient. This could be a special company event, new product launch, current staff offer etc.

J Interiors Limited									
Mr J Barnes	Emp. No.	1	NI No.	NW 23 03 88 89 A	Tax Code	5471			
Pay Period	1	Start	2	End	By	By	By	By	By

Total Deductions	228.33	Deductions TD	202.00						
				Net Pay: 529.67					

“A perfect
solution for
including staff
information to
your secure
mailing”

Zip-Out mailers and Easi-Seal forms can be sealed either by hand, or by using an appropriate desktop sealing machine. Our HS-150 and HS-250 have been designed and built by us specifically to work with both form types.

HS250

The HS250 is designed to meet your folding requirements. With two adjustable fold plates, offering the ability to fold and seal most formats of document. By linking the sealer on-line with a laser printer, not only is the job done in a single step, but security and integrity are increased as the document is not handled between printing and sealing. It can also be used for standard letters making the printing and folding one quick and easy process.

HS150

The HS150 is a standalone version of the HS250 and can be fed and processed from a stack of pre-printed forms. Offering a quick folding solution for all your letter requirements.

Support

Along with the supply of the system, DMS are able to ensure the reliability of your system through installation and training followed by on-site support from our team of technicians.
